

NOTICE

Routine Inspection Reports Available for Levee Systems in Fremont County, Iowa

In 2016, the United States Army Corps of Engineers (USACE) performed routine inspections of the L-594-575 (BW-PV-Waubonsie) Levee System sponsored by the Benton-Washington Levee District, Pleasant Valley Levee District, and Waubonsie Drainage District in Fremont County, Iowa.

The inspections resulted in an unacceptable rating due to unwanted vegetation growth, encroachments, depressions/rutting, animal control, erosion/bank caving, reduced capacity at relief wells, and shoaling. The sponsors will address these issues and apply for an extension of PL84-99 emergency assistance eligibility under the USACE SWIF program. Corrections are planned for completion by 2026.

L-594-575 (BW-PV-Waubonsie) Levee System
